Subject Index of Volume 187

Ageing
influence of aging on discontinuous dissolution in Al22at.%Zn alloy, 57
Alloys
an investigation of grain rotation and grain elongation in a superplastic alloy, 161
chemical interaction between a sialon cutting tool and iron-based alloys, 177
deep drawing of Ir–0.3%W alloys, 155
influence of aging on discontinuous dissolution in Al22at.%Zn alloy, 57
melting Fe–C alloys under varying nitrogen pressures, 167
on micromechanisms of fatigue crack growth in the 8090 T651 aluminium–lithium alloy, 37
Si phase nucleation on SiC particulate reinforcement in hypereutectic Al–Si alloy matrix, 65
statistical treatment of fracture toughness data of Ti–Al–Si–Nb alloys, 105
Aluminium
fabrication of Al matrix *in situ* composites via self-propagating synthesis, 189
fabrication of Al matrix *in situ* composites via self-propagating synthesis, 189
influence of aging on discontinuous dissolution in Al22at.%Zn alloy, 57
nitriding reactions of Ti–Al system induced by ball milling in ammonia gas, 51
on micromechanisms of fatigue crack growth in the 8090 T651 aluminium–lithium alloy, 37
Si phase nucleation on SiC particulate reinforcement in hypereutectic Al–Si alloy matrix, 65
statistical treatment of fracture toughness data of Ti–Al–Si–Nb alloys, 105
Ammonia
nitriding reactions of Ti–Al system induced by ball milling in ammonia gas, 51

Ball milling
nitriding reactions of Ti–Al system induced by ball milling in ammonia gas, 51
Beryllium
the effects of boron and beryllium on the microstructure of rapidly quenched Fe–Pt alloys, 145
Boron
the effects of boron and beryllium on the microstructure of rapidly quenched Fe–Pt alloys, 145

Carbon
melting Fe–C alloys under varying nitrogen pressures, 167
microstructure and mechanical properties of reaction-formed silicon carbide (RFSC) ceramics, 183
Si phase nucleation on SiC particulate reinforcement in hypereutectic Al–Si alloy matrix, 65
Ceramics
microstructure and mechanical properties of reaction-formed silicon carbide (RFSC) ceramics, 183
Composites
a numerical analysis of fracture and high temperature creep characteristics of brittle matrix composites with discontinuous ductile reinforcements, 125
fabrication of Al matrix *in situ* composites via self-propagating synthesis, 189
Cracking
on micromechanisms of fatigue crack growth in the 8090 T651 aluminium–lithium alloy, 37
screw dislocations around a radial surface crack in a circular bar, 139
Creep
a numerical analysis of fracture and high temperature creep characteristics of brittle matrix composites with discontinuous ductile reinforcements, 125
Cyclic frequency
influence of cyclic frequency on strain localization and cyclic deformation in fatigue, 23

Deep drawing
deep drawing of Ir–0.3%W alloys, 155
Deformation
influence of cyclic frequency on strain localization and cyclic deformation in fatigue, 23
the influence of dynamic shear loading on plastic deformation and microstructure of tungsten single crystals, 43
Diamond films
finite element analysis of the effectiveness of interlayers in reducing thermal residual stresses in diamond films, 87
Dislocation
dislocation structures in 316L stainless steel cycled with plastic strain amplitudes over a wide interval, 1
screw dislocations around a radial surface crack in a circular bar, 139
Dynamic shear loading
the influence of dynamic shear loading on plastic deformation and microstructure of tungsten single crystals, 43

Eutectoids
states of stresses resulting from thermal and phase changes obtained during the hardening of a eutectoid steel, 77

Fabrication
fabrication of Al matrix *in situ* composites via self-propagating synthesis, 189
Fatigue
influence of cyclic frequency on strain localization and cyclic deformation in fatigue, 23
on micromechanisms of fatigue crack growth in the 9090 T651 aluminium–lithium alloy, 37
Feldspar
Harper–Dorn creep in feldspar, 97
Finite element analysis
finite element analysis of the effectiveness of interlayers in reducing thermal residual stresses in diamond films, 87

Fracture
a numerical analysis of fracture and high temperature creep characteristics of brittle matrix composites with discontinuous ductile reinforcements, 125
statistical treatment of fracture toughness data of Ti–Al–Si–Nb alloys, 105

Grain size
influence of grain size and texture on the cyclic stress–strain response of nickel, 11

Harper–Dorn creep
Harper–Dorn creep in feldspar, 97

Interlayers
finite element analysis of the effectiveness of interlayers in reducing thermal stresses in diamond films, 87
Iridium
deep drawing of Ir–0.3%W alloys, 155
Iron
chemical interaction between a sialon cutting tool and iron-based alloys, 177
melting Fe–C alloys under varying nitrogen pressures, 167
the effects of boron and beryllium on the microstructure of rapidly quenched Fe–Pt alloys, 145

Lithium
on micromechanisms of fatigue crack growth in the 8090 T651 aluminium–lithium alloy, 37

Nickel
influence of grain size and texture on the cyclic stress–strain response of nickel, 11
Niobium
statistical treatment of fracture toughness data of Ti–Al–Si–Nb alloys, 105
Nitrogen
melting Fe–C alloys under varying nitrogen pressures, 167
nitriding reactions of Ti–Al system induced by ball milling in ammonia gas, 51
Nucleation
Si phase nucleation on SiC particulate reinforcement in hypereutectic Al–Si alloy matrix, 65

Plasticity
an investigation of grain rotation and grain elongation in a superplastic alloy, 161
dislocation structures in 316L stainless steel cycled with plastic strain amplitudes over a wide interval, 1
the influence of dynamic shear loading on plastic deformation and microstructure of tungsten single crystals, 43
Platinum
the effects of boron and beryllium on the microstructure of rapidly quenched Fe–Pt alloys, 145

Rapid quenching
the effects of boron and beryllium on the microstructure of rapidly quenched Fe–Pt alloys, 145

Sialon
chemical interaction between a sialon cutting tool and iron-based alloys, 177
Silicon
microstructure and mechanical properties of reaction-formed silicon carbide (RFSC) ceramics, 183
Si phase nucleation on SiC particulate reinforcement in hypereutectic Al–Si alloy matrix, 65
statistical treatment of fracture toughness data of Ti–Al–Si–Nb alloys, 105
Steel
dislocation structures in 316L stainless steel cycled with plastic strain amplitudes over a wide interval, 1
states of stresses resulting from thermal and phase changes obtained during the hardening of a eutectoid steel, 77
Strain
cyclic stress–strain response and strain localization effects under stress-control conditions, 113
dislocation structures in 316L stainless steel cycled with plastic strain amplitudes over a wide interval, 1
influence of cyclic frequency on strain localization and cyclic deformation in fatigue, 23
influence of grain size and texture on the cyclic stress–strain response of nickel, 11
Stress
cyclic stress–strain response and strain localization effects under stress-control conditions, 113
finite element analysis of the effectiveness of interlayers in reducing thermal residual stresses in diamond films, 87
influence of grain size and texture on the cyclic stress–strain response of nickel, 11
states of stresses resulting from thermal and phase changes obtained during the hardening of a eutectoid steel, 77

Texture
influence of grain size and texture on the cyclic stress–strain response of nickel, 11
Titanium
nitriding reactions of Ti–Al system induced by ball milling in ammonia gas, 51
statistical treatment of fracture toughness data of Ti–Al–Si–Nb alloys, 105
Tungsten
deep drawing of Ir–0.3%W alloys, 155
the influence of dynamic shear loading on plastic deformation and microstructure of tungsten single crystals, 43

Zinc
influence of aging on discontinuous dissolution in Al22at.%Zn alloy, 57
